

If you have an Android device, you will see the following message when you attempt to install any test version of this App to your device:

“This type of file can harm your device...” (see graphic below)

To by-pass this and allow the test App to install on your device, follow the steps below.

1. Tap Ok. You will then see a moving arrow in the top bar of your screen which means that the file is downloading to your device.

 This type of file can harm your device. Do you want to keep customeatery362170-dev-0.2--2.93--.apk anyway? 

CANCEL

OK

2. When the arrow has stopped moving, you must swipe down from the top of your screen to show the completed download. Tap on the downloaded file.

3. The following screen will appear. Tap Next> Install

4. You will see the active installation. When it is installed, tap Open. You are done!
